

Ravuri Harshavardhan

Hello, I'm Ravuri HarshaVardhan I'm from Ongole. Currently pursuing B.Tech final Year. I have 1 year of experience in mobile development, including a 8-month internship, where I worked on full-stack projects using technologies such as MongoDB, Express.js, React Native, and Node.js, Reactjs, Nextjs. As an Android and iOS developer, I have built applications from scratch, managing both frontend and backend, and integrating Firebase, Supabase, and Rest APIs. This hands-on experience has sharpened my technical skills and problem-solving abilities. I'm confident that my expertise and passion for continuous learning will allow me to quickly adapt and add value to your team.

Educational Background

- Kalasalingam Academy of Research and Education.
- Bachelor of technology department of computer science and engineering specialization in Artificial Intelligence and machine learning (7 cgpa). (2021 to Pursuing)
- Sri Chaitanya Collage (Mpc 88%)
- Sri Gurudatta High School (10th 9.3 cgpa)

Work experience

- React Native Developer Intern At webMOBI Bengaluru
- React Native Developer intern at Bliptyn Technologies

Projects

- **E commerce Mobile App**
- Developed a full-stack e-commerce application using React Native and Mern. Implemented user authentication, including signup and login functionality, using Jwt Authentication. Designed and built a real-time database utilizing Mongo Database Functions for backend logic and data processing tasks
- **Food Delivery with Admin panel app**
- Developed a delivery app with an admin panel using React Native for the frontend and Firebase for the backend. The app features real-time delivery tracking with OpenStreetMap integration, secure payment processing through Razorpay, and robust user authentication. The admin panel allows efficient management of orders, deliveries, and user data, with real-time updates powered by Firebase Firestore. Designed to be user-friendly and scalable, the app supports seamless order placement, tracking, and payment, catering to both customers and administrators.

Skills

Technical Skills

- Html
- Css
- JavaScript
- Reactjs
- Nextjs
- React Native
- Mongo Database
- MySQL
- Nodejs
- Expressjs
- Github
- Android Development
- Ios Development
- Firebase
- Supabase
- Rest APIs & third party API
- Maps Integration
- Redux / Context
- WebSocket

Tools/Software

- X code
- Android Studio
- Visual Studio
- Chrome Dev Too
- Flipper
- Figma
- Postman

Program Language

- JavaScript
- TypeScript

Projects

- **Plan to Travel**
- To plan your travel using MERN stack with React Native, consider Gemini (AI chatBot) building robust application that integrates MongoDB for storing data, Express.js for handling server-side logic, Node.js for backend operations, and React Native for a cross- platform mobile experience. Utilize features like geolocation services, real-time updates, and intuitive user interfaces to enhance the travel planning and booking process seamlessly
- **Logistics Mobile App**
- Developed a cross-platform logistics mobile app using React Native for the frontend and Firebase for the backend, enabling real-time order tracking and seamless user authentication. Integrated Google Maps for delivery visualization, ensuring an intuitive experience for users. Utilized Firebase Firestore for real-time updates and AsyncStorage for offline functionality, allowing continuous data access. Implemented push notifications via Firebase Cloud Messaging (FCM) to provide instant order status updates. This scalable and user-friendly solution enhances delivery management efficiency while ensuring smooth performance across devices
- **NexaLink**
- NexaLink is a cross-platform event management app built with React Native for both Android and iOS. It allows users to share ideas, ask questions, and connect with like-minded attendees during events. For authentication, it integrates Auth0, supporting social login, passwordless sign-in, and JWT-based security. The backend, powered by API integrations, efficiently manages event data, discussions, and notifications. With real-time updates, image caching, and offline support, NexaLink delivers a seamless and engaging event experience for all users

Experiences

- Android Development
- IOS Development
- Error Debugging
- CI/CD Pipeline
- Technical issues
- Backend Integration
- Full Stack Mobile Application
- Responsive Web Site
- Responsive Mobile App UI
- Push Notifications
- Jwt Token
- Mobile Payments Integration
- Animation
- Native Base
- React Native Component Integration
- Tailwind Css
- Third-Party SDKs integration
- Software Development
- Async Storage
- Performance Optimization
- Authentication
- Expo & React Native CLI
- React Native Paper
- Responsive Design
- Code Quality Tools
- Mentoring/Team Collaboration
- Documentation
- Custom Native UI Components

Languages

- Telugu
- Hindi
- English

Hobby's

- Learn Technology's
- Explore New Places
- Mobile App Development
- Creativity & Design Thinking
