PROFESSIONAL SUMMARY

React Native Mobile App Developer with 1+ year of hands-on experience building and shipping production-grade Android and iOS applications. Experienced in developing scalable mobile features including real-time chat, subscription-based access control, QR-based digital identity systems, video-driven user flows, and healthcare applications. Strong focus on reliability, performance, and clean mobile architecture.

TECHNICAL SKILLS

Mobile: React Native (CLI & Expo), Android, iOS, App Store & Play Store Deployment

Languages: TypeScript, JavaScript

Backend & Cloud: Firebase (Auth, Firestore, Cloud Functions), Supabase, Node.js, Express.js, MongoDB

Core: REST APIs, WebSockets, Real-Time Communication, Subscriptions, Payments, Secure Storage, Push Notifications, QR Codes, Video Upload Pipelines

Tools: Git, GitHub, Android Studio, Xcode, VS Code, Postman

PROFESSIONAL EXPERIENCE

React Native Developer — Algorizz Technologies (May 2025 – Present)

- Building and maintaining production mobile features for Android and iOS using React Native and TypeScript.
- Working on subscription flows, secure API integrations, and performance-sensitive screens.
- Collaborating with backend engineers and designers to deliver stable and scalable mobile features.

React Native Developer — WebSeeder Technologies (Apr 2025 – May 2025)

- Improved UI quality, navigation flows, and overall mobile usability.
- Integrated APIs and enhanced data-handling logic for smoother user experiences.

React Native Developer — Bliptyn Technologies (Dec 2024 – Mar 2025)

- Contributed to feature development and real-time updates in React Native applications.
- Improved navigation stability and overall app reliability.

Mobile App Development Intern — WebMOBI (Aug 2024 – Dec 2024)

- Worked on mobile application development using React Native.
- Assisted in building UI screens, integrating APIs, and fixing functional issues.
- Gained hands-on experience with production codebases and collaborative development workflows.

PROJECTS

HubbleMeet — Identity-Based Professional Networking App

HubbleMeet is a next-generation professional networking app enabling one-to-one connections through QR-based digital business cards and short pitch videos.

- Built swipe-based professional discovery flows.
- Implemented QR-based Virtual Business Cards for instant digital identity sharing.
- Developed 30–60 second pitch video upload and playback flows.

- Integrated real-time in-app chat using WebSockets.
- Implemented subscription-based feature access control.

Android: <https://play.google.com/store/apps/details?id=com.hubble.app>

iOS: <https://apps.apple.com/in/app/hubblemeet/id6752544354>

Dandar Patient App — Healthcare & Telemedicine Platform

All-in-one healthcare companion app for appointments, consultations, and medicine ordering.

- Built doctor appointment booking and scheduling workflows.
- Implemented online consultations and real-time chat.
- Developed medicine and healthcare product ordering flows.
- Ensured secure handling of sensitive patient data.

Android: <https://play.google.com/store/apps/details?id=com.dandarpatient&hl=en>

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering (AI & ML)
Kalasalingam Academy of Research and Education | 2021 – 2025
